boxmate · system architecture

Updated 2026-10-12 · slices A + B built (video, reliability)

Open decisions + build progress

Build progress: A video only ✓ built · B reliability (TURN, heartbeats, timeouts) ✓ built · C Azure deploy next

Later: abuse protection · kill-shot photo · more instances + load balancer · Redis queue (behind queue interface) · Redis pub/sub (into send-to-player) · matchmaker worker · rematch
Environments: dev on GitHub Codespaces (one process) · prod on Azure Container Apps, deployed by GitHub Actions via GitHub Container Registry · budget alert · env vars + secrets
Code: repo server/ web/ shared/ · tests: Vitest, judge first
